

The Collective, Old Oak

MACE

Hard & Soft Landscaping

Community living appears to be 'big business' these days and this impressive development on the canal crossing Old Oak Lane in Acton had many challenges.

With a very tight footprint, there were many logistical challenges on the project and Fannon were selected for their 'can-do' attitude. The finish quality on this project has to be seen to be believed, that is why we used this project as a showcase for some of our clients.

Scope of work:

The development consisted of; hard landscaping, construction of bunded RC planters, S278 Works, parking space construction with EV services installed, soft landscaping & planting, external furniture and STAT service connections & complex external services installation

Contract Information:
